I am a result-driven and goal-oriented Developer/Researcher with a special interest of using Design Thinking into the products I develop. I imagine myself standing at the intersection of Data, Design and Product ensuring the success of each project I work on.

Professional Experience

DEC 2018 – JAN 2019

Project Developer / DELHI TECH. UNIVERSITY, Delhi (Visiting Researcher)

- Performing social media graph analysis to identify the opinion leaders in any social context and promote any positive/negative news on the basis of this information.

NOV 2018 – DEC 2018

Project Developer / CARLETON UNIVERSITY, Canada (Remote Internship)

- Working on using RNNs to perform Entity Linking on video subtitles so that it can be used to link to the knowledge base to provide resources for enhancing e-learning experience.

MAY 2018 – NOV 2018

Software Developer Intern / IBM, Bangalore

- Conducted research work in business intelligence department of IBM Watson.
- Worked on the IBM B2B Sterling Integrator.
- Developed Services and Business Processes (Workflows) for improved Customer Engagement.
- Handled Deployment of Business APIs and developed a REST-API Client service and workflow.
- Developed XML/JSON Transformation adapter for the data conversion needs.
- Transformed the underlying B2B REST API framework from IBM TenX to SpringBoot.
- Developed an UI interface in Angular-6 for the Business APIs.
- Demonstrated usage of Microservice Architecture of Software development for efficient management and modular deployment methods

NOV 2017 – JAN 2018

AI Developer Intern / SLIET, Longowal

- Organized and led Idea generation meetings for development of AI applications like Chatbots and Smart Image classification.
- Discussed use cases of AI usage with potential users, as a part of User Experience research.
- Developed a chatbot called Florence.AI for studying human interaction in local shops.

MAY 2017 – JUL 2017

Big Data Engineer Intern / APTRON SOLUTIONS, Noida

- Wrote scripts to deal with real-time streaming data.
- Performed analysis on collected data, using Open Source platform Hadoop and Hive on the AWS Cloud cluster.

JUN 2016 – JUL 2016

Database Intern / UFLEX, Noida

- Gained experience of basic concepts of data processing.
- Handled Database storage formatting and cleansing tasks for three departments.

Major Projects

- Intellistudy** – AI based web application to provide personalized learning on the basis of understanding of Individual student.
- Dsense.AI** – AI based disaster management system that keeps track of Human-resource during mass-scale disasters using Clustering.
- Twitter Data Sentimental Analysis** – Sentimental analysis of Real-time streaming twitter data.
- Dgrafica** – Created a scientific data-chart classification, extraction and summarization program that uses Google's Tensorflow.
- Tenacity.AI** – An intuitive web application that uses IBM Watson Cognitive APIs for gaining insights from video content.
- Florence.AI** – Chatbot to make functioning of local shops easier. Scraped and analyzed datasets for human conversation archives to determine Intents for the chatbot.
- Visualization of the Average Rainfall pattern of India** – Analysis of the data available over the entire last century.
- Social media Virality Prediction** – Twitter social media graph visualization for topic virality prediction and opinion leader identification.
- Entity linking on the Video Content** – Implementation of the Dynamic Dictionary feature on the E-learning platforms.
- Dframe** – A Dashboard for the automated deployment of Docker Image builds and continuous monitoring over the four stages – Development, QA, Sandbox, Production

Skills

- REST APIs
- Version Control
- OOPs
- SQL
- Prototyping
- UX Research
- Design Thinking
- Graphic Design
- HTML/CSS/Javascript
- C/C++/Java/Python
- Spring Boot
- Angular 6
- Materialize/Bootstrap
- Machine Learning
- Data Mining/Analysis
- Data Visualization

Formal Education

2015 - PRESENT

Bachelor of Technology / Indian Institute of Information Technology, Jabalpur

- Major: Computer Science & Engineering
- GPA: 8.94/10
- **Academic Excellence Award** for continuous 3 years.

MAY 2015

Intermediate / Indirapuram Public School, Ghaziabad

- Percentage: 95.4%, Valedictorian

Awards & Achievements

- **International Rank 7** in International Informatics Olympiad (IIO).
- **2nd Position** in the Machine Learning and AI hackathon organized by **IBM**.
- Qualified for the Final round of **Smart India Hackathon (2018)** and was placed under **15 finalists**.
- Placed **under 10** in **Lab Call-For-Code Hackathon** organized by **IBM** and qualified for the final Global round.
- Secured **5th position out of 42 teams** in the Think-O-Hackathon sponsored by **Vassar Labs**.
- Official technical writer for **The Startup**, **Codeburst.io** and **Mozilla India** Medium publications.
- Contributor of **Global Translator Community** of Coursera.
- Received an invitation to **NVIDIA Developer Connect**.
- Received an invitation to **Google Dev-Fest**.

Publications & Articles

- REST Client Adapter in the IBM-B2B Sterling Integrator portfolio (**IBM Developerworks**)
- Unsupervised Single-View Depth Estimation for Real Time Inference (**Submitted in IEEE MLSP 2019**)
